INTRODUCING STUDENTS TO THE FOOD TECHNOLOGY INDUSTRY

Editor's Note:

Please scroll down to access high-res image of the students at Wixon. We welcome your use.

Wixon, a manufacturer of seasonings, flavors, and technologies, in St. Francis, Wisconsin, recently hosted 40 seventh grade students for an inside look at what food technologists do. The students spent several hours with Wixon staff, learning about the company, and how flavor systems and seasonings are used to enhance the taste of food. The day included sampling of some of Wixon's newest innovations.
